PRESS RELEASE

Inno at Stockholm Furniture Fair, Feb. 4-8, 2020
Hall C Stand 12:41

Modular flexibility:

In-Tensive table system with A-leg, design Jouni Leino

A-leg in epoxy coated steel is a fresh option for In-tensive range. It is for the first time showcased at Stockholm Furniture Fair 2020. Functionality and timeless design are tied here together with modular flexibility. As a forerunner (since 1998) of electrified meeting tables Inno offers a wide range of customized solutions for meeting and conference. The main features include modular structure, tabletops in many shapes, sizes and materials together with a variety of leg versions. A spacious cable tray accessed through hinged flaps offers easy cable management and hiding conference equipment.

Streamlined elegance:

Tilt chairs, design Juha Rista

The elegant lines of the chair were inspired by the streamlined car designs of the 50's. With new compact size, the smaller Tilt chairs are perfect visitor chairs but also an excellent choice for a casual meeting room or as a desk chair in a hotel room.

Sympathetic softness:

Katve space dividers, design Mikko Laakkonen

The look of Katve space divider is sympathetic with natural materials wool and wood. Vertical (V) and horizontal (H) dividers can be used either separately or together giving sight protection and sound absorption. Ideal for lobby, café or office with Ono chairs, design Susanne Gronlund.
